| Background Information | FASN gene codes for an enzyme essential for de novo fatty acid synthesis and cellular substrate energy metabolism<br>Active FASN is a homodimer in which each peptide subunit has a molecular weight of 260 kDa. FASN is<br>overexpressed in various types of cancer including glioblastomas and is a potential therapeutic target. Recently<br>FASN has been reported to contribute to the neurogenesis since FASN mutation caused intellectual disability in<br>mice. |                                       |                     |   |  |

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

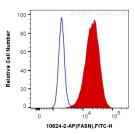

## Selected Validation Data

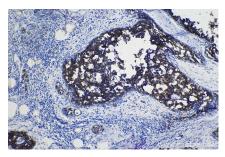

Various lysates were subjected to SDS PAGE followed by western blot with 10624-2-AP (FASN antibody) at dilution of 1:20000 incubated at room temperature for 1.5 hours.

WB result of FASN antibody (10624-2-AP; 1:10000; incubated at room temperature for 1.5 hours) with sh-Control and sh-FASN transfected HeLa cells.

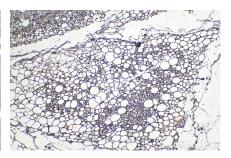

1X10^6 HeLa cells were intracellularly stained with 0.4 ug Anti-Human FASN (10624-2-AP) and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) at dilution 1:1000 (red), or 0.4 ug Control Antibody. Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C).

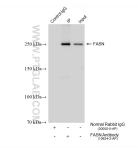

Immunohistochemical analysis of paraffinembedded human breast cancer tissue slide using 10624-2-AP (FASN antibody) at dilution of 1:1000 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

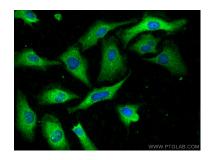

Immunohistochemical analysis of paraffinembedded mouse brown adipose tissue slide using 10624-2-AP (FASN antibody) at dilution of 1:1000 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunohistochemical analysis of paraffinembedded rat brown adipose tissue slide using 10624-2-AP (FASN antibody) at dilution of 1:1000 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

IP result of anti-FASN (IP:10624-2-AP, 4ug; Detection:10624-2-AP 1:10000) with mouse liver tissue lysate 2400 ug. Immunohistochemical analysis of paraffinembedded mouse brain tissue slide using 10624-2-AP (FASN antibody) at dilution of 1:1000 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunofluorescent analysis of (-20°C Ethanol) fixed HeLa cells using FASN antibody (10624-2-AP) at dilution of 1:200 and Multi-rAb CoraLite ® Plus 488-Goat Anti-Rabbit Recombinant Secondary Antibody (H+L) (RGAR002).
