

G-CSFR Polyclonal antibody

Catalog Number: 18310-1-AP

2 Publications

Basic Information

Catalog Number:

18310-1-AP

Size:

300 µg/ml

Source:

Rabbit

Isotype:

IgG

GenBank Accession Number:

BC053585

GeneID (NCBI):

1441

UNIPROT ID:

Q99062

Full Name:colony stimulating factor 3 receptor
(granulocyte)**Calculated MW:**

95 kDa

Observed MW:

85 kDa

Purification Method:

Antigen affinity purification

Recommended Dilutions:

WB 1:500-1:2000

Applications

Tested Applications:

FC, WB, ELISA

Cited Applications:

WB

Species Specificity:

human

Cited Species:

human, mouse

Positive Controls:

WB : human placenta tissue,

Background Information

G-CSF-R, also named as CSF3R, CD114 and GCSFR is the receptor for colony stimulating factor 3, a cytokine that controls the production, differentiation, and function of granulocytes. It is a 130 kD to 150 kD glycoprotein single chain receptor which binds and activated by GCSF. In addition it may function in some adhesion or recognition events at the cell surface. It has been classified as a member of the hematopoietic (cytokine) receptor family, cytokine receptor class I, or the gp 130 related cytokine receptor family (although it does not apparently bind to gp 130). GCSF receptors can be found on neutrophils, myeloid leukemia cells that respond to GCSF, bone marrow cells of neutrophilic granulocyte lineage, and on placental trophoblasts. In addition, a soluble form is also expressed. Mutations in this gene are a cause of Kostmann syndrome, also known as severe congenital neutropenia.

Notable Publications

Author	Pubmed ID	Journal	Application
Mary P Udumula	34144215	Mol Metab	WB

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

Storage Buffer:

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

human placenta tissue were subjected to SDS PAGE followed by western blot with 18310-1-AP (G-CSFR antibody) at dilution of 1:300 incubated at room temperature for 1.5 hours.

1X10⁶ U-937 cells were stained with 0.2ug G-CSFR antibody (18310-1-AP, red) and control antibody (blue). Fixed with 4% PFA blocked with 3% BSA (30 min). Alexa Fluor 488-conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) with dilution 1:1500.
