Background Information

FMNL1, also named as C17orf1, C17orf1B and FMNL, belongs to the formin homology family. It may play a role in the control of cell motility and survival of macrophages. FMNL1 protein may be involved in anti-apoptosis mechanisms. It is overexpressed in lymphoid malignances and is found associated with Akt. 27834-1-AP is a rabbit polyclonal antibody recognises the 125-150 kDa protein. (PMID:16494944)
