| Reconstitution<br>and Storage       | Reconstitution:<br>Reconstitute at 0.25 µg/ µ l in 200 µ l sterile water for short-<br>term storage.<br>After reconstitution with sterile water, if glycerol has no effect<br>on subsequent experiments, it is recommended to add an<br>equal volume of glycerol for long-term storage (see Stability<br>and Storage for more details).<br>If a different concentration is needed for your purposes please   | Shipping:<br>The product is shipped at ambient temperature.<br>Upon receipt, store it immediately at the<br>recommended temperature (see below). |
|                                     | adjust the reconstitution volume as required (please note: the<br>ion concentration of the final solution will vary according to<br>the volume used).<br>Note: Centrifuge vial before opening. When reconstituting,<br>gently pipet and wash down the sides of the vial to ensure full<br>recovery of the protein into solution.   |  |
| Stability and Storage               | Store for up to 12 months at -20°C to -80°C as lyophilized powder.   |  |
| Storage of<br>Reconstituted Protein | Short Term Storage:<br>Store at 2-8°C for (1-2 weeks).<br>Long Term Storage:<br>Aliquot and store at -20°C to -80°C for up to 3 months,<br>reconstitution with sterile water and addition of an equal<br>volume of glycerol. Avoid repeat freeze-thaw cycles.  |  |
