|  | Reconstitution<br>and Storage   | Reconstitution:<br>Reconstitute at 0.25 µg/ µl in 200 µl sterile water for short-<br>term storage.                        |
| After reconstitution with sterile water, if glycerol has no effect<br>on subsequent experiments, it is recommended to add an<br>equal volume of glycerol for long-term storage (see Stability<br>and Storage for more details).<br>If a different concentration is needed for your purposes please<br>adjust the reconstitution volume as required (please note: the<br>ion concentration of the final colution will way a scored to the |   |   |
| ion concentration of the final solution will vary according to<br>the volume used).<br>Note: Centrifuge vial before opening. When reconstituting,<br>gently pipet and wash down the sides of the vial to ensure full<br>recovery of the protein into solution.   |   |   |
