For Research Use Only

CoraLite® Plus 405 Anti-Human CD31 (WM-59)

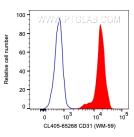

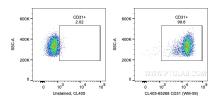

Catalog Number:CL405-65268

Basic Information	Catalog Number: CL405-65268	GenBank Accession Number: BC022512	Purification Method: Affinity purification
	Size: 100tests, 5 µ l/test	GenelD (NCBI): 5175	CloneNo.: WM-59
	Source: Mouse Isotype: IgG1, kappa	ENSEMBL Gene ID: ENSG00000261371 Full Name: platelet/endothelial cell adhesior molecule	Excitation/Emission maxima wavelengths: 399 nm / 422 nm
		Applications	
Species Specificity: Human			
Background Information	CD31, also known as PECAM1 (Platelet endothelial cell adhesion molecule), is a member of the immunoglobulin gene superfamily of cell adhesion molecules. CD31 is a transmembrane glycoprotein that is highly expressed on the surface of the endothelium, making up a large portion of its intracellular junctions. It is also present on the surface of hematopoietic cells and immune cells including platelets, monocytes, neutrophils, natural killer cells, megakaryocytes and some types of T-cell (PMID: 9011572). As well as its role in cell-cell adhesion, CD31 functions as a signaling receptor, and is involved in important physiological events such as nitric oxide production, regulation of T-cell immunity and tolerance, leukocyte transendothelial migration and inflammation and angiogenesis (PMID: 21183735; 20978210; 17872453; 20634489).		
Storage	Storage: Store at 2-8°C. Avoid exposur Storage Buffer: PBS with 0.09% sodium azide	re to light. Stable for one year after shipme e and 0.5% BSA.	nt.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

1X10⁶ human PBMCs were surface stained with 5 ul Coralite® Plus 405 Anti-Human CD31 (CL405-65268, Clone:WM-59) or unstained. Cells were not fixed. Monocytes were gated.

1X10^6 human PBMCs were surface stained with 5 ul Coralite® Plus 405 Anti-Human CD31 (CL405-65268, Clone:WM-59) (red) or unstained. Cells were not fixed. Monocytes were gated.
