For Research Use Only

CoraLite® Plus 488 Anti-Human PD-L1 (B7-H1) (29E.2A3)

Catalog Number: CL488-65081

Basic Information

Catalog Number: CL488-65081

GenBank Accession Number: BC069381

Purification Method: Affinity purification

GeneID (NCBI):

29126

CloneNo.: 29E.2A3

100tests, 5 μ l/test Source:

UNIPROT ID:

Excitation/Emission maxima

Mouse Isotype: Q9NZQ7 Full Name: CD274 molecule wavelengths: 493 nm / 522 nm

IgG2b, kappa

Applications

Tested Applications:

FC

Species Specificity:

Human

Background Information

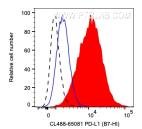

Programmed cell death ligand 1 (PD-L1, CD274, or B7-H1), is the first member of B7 family to be discovered. B7 family molecules are type I transmembrane proteins belonging to the immunoglobulin superfamily. In concert with their CD28 family receptors, the B7s are key regulators of the adaptive immune response. PD-L1 is suggested as a negative regulator of T and B cell, and plays important role in mediating tolerance of lymphocytes to self-antigens. It is also involved in the costimulatory signal, essential for T-cell proliferation and production of IL10 and IFNG, in an IL2-dependent and a PD-1-independent manner.

Storage

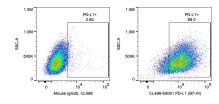

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 0.1% sodium azide and 0.5% BSA, pH 7.3.

Selected Validation Data

1X10^6 day 3 PHA treated human PBMCs were surface stained with 5 ul Coralite® Plus 488 Anti-Human PD-L1 (B7-H1) (CL488-65081, Clone: 29E.2A3) (red) or Mouse IgGZb Isotype Control (blue). Unactivated PBMCs were surface stained with CL488-65081 (black). Cells were not fixed. Lymphocytes were gated.

1X10^6 day 3 PHA treated human PBMCs were surface stained with 5 ul Coralite® Plus 488 Anti-Human PD-L1 (B7-H1) (CL488-65081, Clone: 29E.2A3) or Mouse IgG2b Isotype Control. Cells were not fixed. Lymphocytes were gated.
