

Nectin 2 Polyclonal antibody

Catalog Number: 10100-2-AP

1 Publications

Basic Information

Catalog Number:

10100-2-AP

Size:

130 µg/ml

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG0149

GenBank Accession Number:

BC003091

GeneID (NCBI):

5819

UNIPROT ID:

Q92692

Full Name:

poliovirus receptor-related 2
(herpesvirus entry mediator B)

Calculated MW:

58 kDa

Purification Method:

Antigen affinity purification

Recommended Dilutions:

WB 1:200-1:1000

Applications

Tested Applications:

WB, ELISA

Cited Applications:

WB, IF

Species Specificity:

human, mouse

Cited Species:

monkey

Positive Controls:

WB : mouse kidney tissue, 3T3-L1 cells, mouse heart tissue

Background Information

Poliovirus receptor-related 2 (herpesvirus entry mediator B) (PVRL2, synonyms: HVEB, PRR2, CD112, PVRR2) is an adhesion molecule widely expressed in cell lines of different lineages, including hematopoietic, neuronal, endothelial and epithelial cells. CD112 belongs to a new family of immunoglobulin-like molecules that includes four members (CD111, CD112, PRR3 and CD155) sharing an ectodomain made of three Ig domains, of V, C, C types. CD112 is expressed in the myelo-monocytic and megakaryocytic hematopoietic lineages and the function in hematopoiesis is currently unknown. CD112 is an intercellular homophilic adhesion. CD112 localizes specifically at adherens junctions via its cytoplasmic interaction with the scaffold F-actin binding protein afadin. This interaction is mediated by a sequence located to the C terminal ends of both isoforms of CD112 (A/ExYV) and the PDZ domain of afadin. This sequence is also found in CD112 and PRR3 and represents a specific consensus in the family, which is also named nectin family. Disruption of the murine CD112 gene leads to infertility of male mice with morphologically aberrant spermatozoa. CD112 mediates entry of some alphaherpesvirus mutants (also named HveB) via its V domain. CD112 is involved in cell to cell spreading of viruses

Notable Publications

Author	Pubmed ID	Journal	Application

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

Storage Buffer:

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

mouse kidney tissue were subjected to SDS PAGE followed by western blot with 10100-2-AP (Nectin 2 antibody) at dilution of 1:300 incubated at room temperature for 1.5 hours.
