Background Information

CRMP1 (Collapsin response mediator protein 1) is also named as DPYSL1, ULIP3, DRP-1 and belongs to the collapsin response mediator protein family, which are a family of five cytoplasmic proteins predominantly expressed in the developing nervous system. CRMP1, the predicted 62-kDa protein and its 75-kDa isoform corresponding to its N-terminal splice variant already described for embryonic, neonatal, and adult brain of the rat are evidenced in the cortex of adult mouse (PMID:15834957). This protein is involved in invasion, and aggressiveness of prolactin pituitary tumors.
