## For Research Use Only

## PKIB Polyclonal antibody

Catalog Number: 11942-1-AP

**Basic Information** 

Catalog Number: GenBank Accession Number: 11942-1-AP BC036011

 Size:
 GeneID (NCBI):

 900 µg/ml
 5570

 Source:
 UNIPROT ID:

 Rabbit
 Q9C010

IgG protein kinase (cAMP-dependent,

Full Name:

Immunogen Catalog Number: catalytic) inhibitor beta

AG2541 Calculated MW: 78 aa. 9 kDa

**Applications** 

**Tested Applications:** 

Isotype:

IHC, ELISA

Species Specificity: human, mouse

Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (\*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0 Positive Controls:

IHC : human stomach cancer tissue, human gliomas tissue, mouse kidney tissue, mouse brain tissue

**Purification Method:** 

IHC 1:50-1:500

Antigen affinity purification

Recommended Dilutions:

**Background Information** 

The cAMP-dependent protein kinase inhibitor-  $\beta$  (PKIB) is also named as PRKACN2. PKIB is presumed to be one of the regulatory factors controlling the cAMP-dependent protein kinase A signaling pathway (PMID: 23224602). PKIB plays an important role in regulating the proliferation, migration, and even metastasis of osteosarcoma (PMID: 17195088). The expression of PKIB in the cytoplasm of tumor is closely related to pAkt and the triple negative breast cancer (PMID: 28387904).

Storage

Storage:

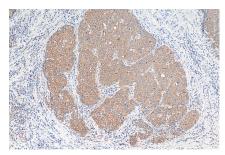

Store at -20°C. Stable for one year after shipment.

Storage Buffer:

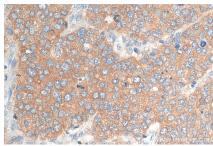

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

## Selected Validation Data

Immunohistochemical analysis of paraffinembedded human stomach cancer tissue slide using 11942-1-AP (PKIB antibody) at dilution of 1:200 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunohistochemical analysis of paraffinembedded human stomach cancer tissue slide using 11942-1-AP (PKIB antibody) at dilution of 1:200 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).
