For Research Use Only

Prion protein PrP Polyclonal antibody, PBS Only

Catalog Number:12555-1-PBS

Basic Information	Catalog Number: 12555-1-PBS	GenBank Accession Number: BC022532	Purification Method: Antigen affinity purification
	Concentration: 1 mg/ml	GenelD (NCBI): 5621	
	Source: Rabbit	UNIPROT ID: F7VJQ1	
	Isotype: IgG	Full Name: prion protein	
	Immunogen Catalog Number: AG3257	Calculated MW: 34 kDa	
		Observed MW: 30 kDa	
Applications	Tested Applications: WB, IHC, FC (Intra), IP, Indirect ELI	SA	
	Species Specificity: human, mouse, rat		
Background Information	Prion protein (PRNP) is a ubiquitous membrane glycoprotein whose abnormal self-replicating, misfolded form is widely believed to cause several central nervous system disorders, collectively known as Transmissible Spongiform Encephalopathies (TSE). Prion diseases are TSEs, attributed to conformational conversion of the cellular prion protein (PrPC) into an abnormal conformer that accumulates in the brain. The two isoforms, PrPC and PrPS, have the same primary amino acid sequence and only differ in conformation. While PrPC is composed of 42% α - helix and only 3% β -sheet, PrPSc is composed of 30% α -helix and 43% β -sheet. PrPC converts to its pathogenic isoform when the region corresponding to the residues 108-144 fold into β -sheets. PrPC is very soluble in detergents and easily digested by proteases while the PrPSc is insoluble in detergents and resistant to protease digestion. Prion diseases exist in infectious, sporadic, and genetic forms.		
Storage	Storage: Store at -80°C. The product is shipped with ice packs. Upon receipt, store it immediately at -80°C Storage Buffer: PBS only

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

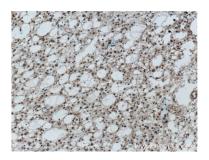

Selected Validation Data

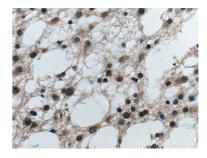

mouse brain tissue were subjected to SDS PAGE followed by western blot with 12555-1-AP (PrP Antibody) at dilution of 1:1000 incubated at room

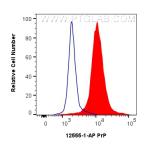

IP result of anti-PrP (IP:12555-1-AP, 4ug; Detection:12555-1-AP 1:1000) with mouse brain tissue lysate 4000ug. This data was developed using the same antibody clone with 12555-1-PBS in temperature for 1.5 hours. This data was developed using the same antibody clone with 12555-1-PBS in a different storage buffer formulation. a different storage buffer formulation.

Immunohistochemical analysis of paraffin-embedded human gliomas tissue slide using 12555-1-AP (PrP Antibody) at dilution of 1:200 (under 10x lens). This data was developed using the same antibody clone with 12555-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffin-embedded human gliomas tissue slide using 12555-1-AP (PrP Antibody) at dilution of 1:200 (under 40x lens). This data was developed using the same antibody clone with 12555-1-PBS in a different storage buffer formulation.

1x10^6 SH-SY5Y cells were intracellularly stained with 0.4 ug Anti-Human PrP (12555-1-AP) and CoraLite@488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) at dilution 1:1000 (red), or 0.4 ug Isotype Control. Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C). This data was developed using the same artibody clone with 12555-1-PR5 in a same antibody clone with 12555-1-PBS in a different storage buffer formulation.
