Background Information

Human SAA proteins are a group of apolipoproteins mainly found in the high density lipoprotein (HDL) portion of plasma. The serum amyloid A (SAA) protein is an acute phase apolipoprotein reactant produced mainly by hepatocytes and under the regulation of inflammatory cytokines (PMID: 12011456). Reactive, secondary amyloidosis is characterized by the extracellular accumulation in various tissues of the SAA2 protein (PMID: 1463770). This antibody can recognize SAA1 and SAA2.
