

For Research Use Only

M-CSF Polyclonal antibody

Catalog Number: 14779-1-AP **9 Publications**

Basic Information

Catalog Number: 14779-1-AP	GenBank Accession Number: BC021117	Purification Method: Antigen affinity purification
Size: 600 µg/ml	GeneID (NCBI): 1435	
Source: Rabbit	UNIPROT ID: P09603	
Isotype: IgG	Full Name: colony stimulating factor 1 (macrophage)	
Immunogen Catalog Number: AG6294	Calculated MW: 60 kDa	
	Observed MW: 70 kDa	

Applications

Tested Applications:
ELISA

Cited Applications:
Cell treatment, IF, WB

Species Specificity:
human

Cited Species:
human, mouse

Background Information

Colony stimulating factor-1 (CSF-1) is a homodimeric glycoprotein that humorally regulates the proliferation and differentiation of mononuclear phagocytic cells and locally regulates cells of the female reproductive tract. Alternative splicing of the human CSF-1 mRNA leads to alternative expression of the CSF-1 homodimer as a secreted glycoprotein or as a membrane-spanning molecule with cell surface biological activity. CSF-1 is predominantly secreted as highly sulfated species of 375- and 250-kDa with a smaller amount of a 100-kDa species. The three predominant CSF-1 species were shown to be an 80-kDa homodimer, an 80-kDa/50-kDa heterodimer, and a 50-kDa homodimer. (PMID: 1733926) This antibody could recognize 60 kDa, 48 kDa, 29 kDa isoforms.

Notable Publications

Author	Pubmed ID	Journal	Application
Chengmei Huang	34583750	J Exp Clin Cancer Res	WB

Storage

Storage:
Store at -20°C. Stable for one year after shipment.

Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage
