Background Information

Gamma synuclein, also known as SNCG, BCSG1, belongs to the synuclein family. SNCG is a synuclein protein found primarily in the peripheral nervous system and retina (PMID 11806835). SNCG is the least conserved of the synuclein proteins and is detected in the brain, ovarian tumors, and the olfactory epithelium (PMID 9750188). SNCG is expressed in high abundance in breast cancer but scarcely at all in a normal breast and is considered a breast cancer marker (PMID: 10813729).
