Background Information

Serum amyloid A1(SAA1) is a member of the serum amyloid A family of apolipoproteins. SAA1 is an acute phase apolipoprotein reactant produced mainly by hepatocytes and under regulation of inflammatory cytokines. Reactive, secondary amyloidosis is characterized by the extracellular accumulation in various tissues of the SAA1 protein. Elevated serum SAA1 protein levels may be associated with lung cancer(PMID: 1463770). This antibody can recognize SAA1 and SAA2.
