Background Information

METTL11A, also known as NTMT1 (N^α-trimethyllysine hydrolase), is an enzyme that belongs to the methyltransferase-like (METTL) protein family. It plays a crucial role in epigenetic processes, particularly in the methylation of proteins, which can influence gene expression and other cellular functions. METTL11A is regulated by other members of the METTL family, such as METTL11B and METTL13, which can either activate or inhibit its function.

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

Storage Buffer:

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 17184-1-AP (METTL11A antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours.

Immunohistochemical analysis of paraffin-embedded human ovary cancer tissue slide using 17184-1-AP (METTL11A antibody) at dilution of 1:100 (under 20x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).
