

PCDH21 Polyclonal antibody

Catalog Number: 17424-1-AP

Basic Information

Catalog Number:

17424-1-AP

Size:

600 ug/ml

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG11451

GenBank Accession Number:

BC038799

GeneID (NCBI):

92211

UNIPROT ID:

Q96JP9

Full Name:

protocadherin 21

Calculated MW:

745 aa, 82 kDa

Observed MW:

110-120 kDa

Purification Method:

Antigen affinity purification

Recommended Dilutions:

WB 1:500-1:1000

Applications

Tested Applications:

WB, ELISA

Species Specificity:

human, mouse, rat

Positive Controls:

WB : mouse retina tissue, rat retina tissue

Background Information

Protocadherins, which constitute the largest subgroup within the cadherin superfamily, are predominantly expressed in the nervous system and are probably involved in the regulation of neuronal recognition and connectivity (PMID: 17936607; 12231349; 17133224). PCDH21 (protocadherin 21), also known as CDHR1, is a photoreceptor-specific cadherin protein containing six ECs and an intracellular domain. The mutations of PCDH21 cause recessive retinal degeneration and autosomal recessive cone-rod dystrophy in humans (PMID: 16288196; PMID: 20805371). The full length of the PCDH21 protein is 120 kDa, the N-terminal soluble fragment is 95 kDa, and the C-terminal fragment is 25 kDa (PMID: 35066146; PMID: 18654668; PMID: 33964272).

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

Storage Buffer:

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 17424-1-AP (PCDH21 antibody) at dilution of 1:600 incubated at room temperature for 1.5 hours.
