NOX2 Polyclonal antibody Catalog Number: 19013-1-AP Featured Product

Featured Product

189 Publications

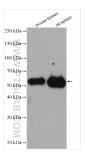

Basic Information	Catalog Number: 19013-1-AP	GenBank Accession Number: BC032720	Purification Method: Antigen affinity purification	
	Concentration:	GenelD (NCBI):	Recommended Dilutions:	
	650 ug/ml	1536	WB 1:2000-1:8000 IHC 1:500-1:2000	
	Source: Rabbit	UNIPROT ID: P04839	IF-P 1:200-1:800	
	Isotype:	Full Name:		
	lgG	cytochrome b-245, beta polypeptide		
	Immunogen Catalog Number: AG5536	Calculated MW: 577 aa, 65 kDa		
		Observed MW: 55 kDa		
Applications	Tested Applications:	Positive Controls:		
	WB, IHC, IF-P, FC (Intra), ELISA Cited Applications: WB, IHC, IF, CoIP		ouse spleen tissue, Jurkat cells, Raji cells, 1 plasma, rat spleen tissue	
	Species Specificity:	IHC : h	uman tonsillitis tissue, mouse spleen tissue	
	human, mouse, rat	IF-P : n	mouse spleen tissue, human tonsillitis tissue	
	Cited Species:			
	human, mouse, rat, pig, rabbit, canine Note-IHC: suggested antigen retrieval with			
	TE buffer pH 9.0; (*) Alterno retrieval may be performed buffer pH 6.0	atively, antigen		
Background Information	NOX2, also named as CYBB, CGD, 91-phox, gp91-1, gp91-phox, p22 phagocyte B-cytochrome, cytochrome b-245 and beta polypeptide, is a critical component of the membrane-bound oxidase of phagocytes that generates superoxide It is the terminal component of a respiratory chain that transfers single electrons from cytoplasmic NADPH across the plasma membrane to molecular oxygen on the exterior. This full length protein has three glycosylation sites. CYBB is found in human cardiomyocytes as multiple bands:the signal between 55 and 65 kDa is probably the unglycosylated protein, because the predicted molecular weight of unglycosylated CYBB protein is approximately 58 kDa(PMID: 17587483) to 65 kDa in phagocytes and the bands around 80 kDa probably represent glycosylated CYBB, as has also been shown in human umbilical vein endothelial cells(PMID:12610097). In other reports, it also can be detected a band of 91 kDa(PMID:19965781).

Selected Validation Data

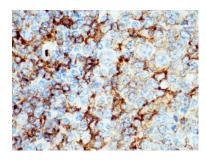

Various lysates were subjected to SDS PAGE followed by western blot with 19013-1-AP (NOX2 antibody) at dilution of 1:8000 incubated at room temperature for 1.5 hours.

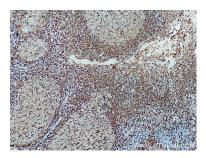

mouse spleen tissue were subjected to SDS PAGE followed by western blot with 19013-1-AP (NOX2 antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours.

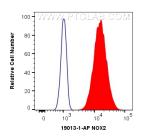

Immunohistochemical analysis of paraffinembedded human tonsillitis tissue slide using 19013-1-AP (NOX2 antibody) at dilution of 1:1000 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

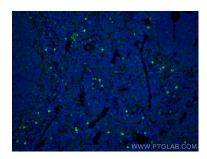

Immunohistochemical analysis of paraffinembedded human tonsillitis tissue slide using 19013-1-AP (NOX2 antibody) at dilution of 1:1000 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

Immunohistochemical analysis of paraffinembedded human tonsillitis tissue slide using 19013-1-AP (NOX2 antibody) at dilution of 1:1000 (under 4x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

1X10^6 RAW 264.7 cells were intracellularly stained with 0.4 ug Anti-Human NOX2 (19013-1-AP) and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) at dilution 1:1000 (red), or 0.4 ug Isotype Control. Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C).

Immunofluorescent analysis of (4% PFA) fixed paraffin-embedded mouse spleen tissue using NOX2 antibody (19013-1-AP) at dilution of 1:400 and Coralite®488-Conjugated Goat Anti-Rabbit IgG(H+L) (SA00013-2). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).
