

For Research Use Only

NSG1 Polyclonal antibody, PBS Only

Catalog Number:19923-1-PBS

Basic Information

Catalog Number:

19923-1-PBS

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG13888

GenBank Accession Number:

BC001745

GeneID (NCBI):

27065

UNIPROT ID:

P42857

Full Name:

DNA segment on chromosome 4
(unique) 234 expressed sequence

Calculated MW:

185 aa, 21 kDa

Observed MW:

16-21 kDa

Purification Method:

Antigen affinity purification

Applications

Tested Applications:

WB, Indirect ELISA

Species Specificity:

human, mouse, rat

Background Information

NSG1, also known as Neuron-Enriched Endosomal Protein of 21 kDa (NEEP21), is a protein encoded by the NSG1 gene located on human chromosome 4p16.3. The Neuron-Specific Gene (NSG) family includes NSG1, NSG2, and NSG3. As their name indicates they are expressed almost exclusively in neurons, and localize to multiple subcellular organelles including the Golgi apparatus, early and late endosomes, and the plasma membrane. As a highly enriched endosomal protein within neuronal cells, NSG1 has been discovered to facilitate the process of epithelial-mesenchymal transition (EMT) in esophageal squamous cell carcinoma (ESCC). (PMID: 37872157, PMID: 41415429)

Storage

Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:

PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 19923-1-AP (NSG1 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 19923-1-PBS in a different storage buffer formulation.
