

For Research Use Only

GUCA1C Polyclonal antibody, PBS Only

Catalog Number: 21531-1-PBS

Basic Information

Catalog Number: 21531-1-PBS	GenBank Accession Number: BC103993	Purification Method: Antigen affinity purification
Source: Rabbit	GeneID (NCBI): 9626	
Isotype: IgG	UNIPROT ID: O95843	
Immunogen Catalog Number: AG16157	Full Name: guanylate cyclase activator 1C	
	Calculated MW: 209 aa, 24 kDa	

Applications

Tested Applications:
IHC, Indirect ELISA

Species Specificity:
human, rat

Background Information

The guanylate cyclase-activating proteins (GCAPs), Ca²⁺-binding proteins of the calmodulin gene superfamily, function as regulators of photoreceptor guanylate cyclases (PMID: 15336959). Three different GCAPs (GCAP1, GCAP2, and GCAP3) are identified in vertebrate retina (PMID: 12596930). The cone-specific guanylate cyclase-activating protein 3 (GCAP3) has been shown to regulate the enzymatic activity of membrane-bound guanylate cyclases (GCs) in bovine and teleost fish photoreceptors, to an extent comparable to that of the paralog protein GCAP1 (PMID: 35328663).

Storage

Storage:
Store at -80°C.
The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:
PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Immunohistochemical analysis of paraffin-embedded rat eye tissue slide using 21531-1-AP (GUCA1C antibody) at dilution of 1:800 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 21531-1-PBS in a different storage buffer formulation.
