

For Research Use Only

Trehalase Polyclonal antibody

Catalog Number: 21685-1-AP

1 Publications

Basic Information

Catalog Number:

21685-1-AP

Concentration:

350 ug/ml

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG16246

GenBank Accession Number:

BC109206

GeneID (NCBI):

11181

UNIPROT ID:

O43280

Full Name:

trehalase (brush-border membrane glycoprotein)

Calculated MW:

583 aa, 67 kDa

Observed MW:

67-70 kDa

Purification Method:

Antigen Affinity purified

Recommended Dilutions:

WB 1:500-1:3000

Applications

Tested Applications:

WB, ELISA

Cited Applications:

WB

Species Specificity:

human, mouse

Cited Species:

mouse

Positive Controls:

WB : mouse small intestine tissue,

Background Information

Trehalase is the enzyme hydrolyzing trehalose and belongs to the glycosyl hydrolase 37 family. In humans and most mammals, trehalase is found in the brush borders of the intestinal mucosa, kidney, liver, and blood plasma. Trehalases are conserved enzymes that catalyze the hydrolysis of one of two glycoside bonds of trehalose. With the exception of vertebrates where trehalase is required for the degradation of ingested trehalose, in other animal groups it is involved in diverse physiological processes including carbohydrate metabolism, resumption of growth in certain resting cells, germination of spores in fungi, recovery from stress conditions, etc (PMID: 25429048, PMID: 30628830).

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

Storage Buffer:

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Mouse small intestine tissue lysate were subjected to SDS PAGE followed by western blot with 21685-1-AP (Trehalase antibody) at dilution of 1:1500 incubated at room temperature for 1.5 hours.
