For Research Use Only

G6PC Polyclonal antibody

Catalog Number:22169-1-AP

33 Publications

Purification Method:

IHC 1:50-1:500

Positive Controls:

IHC: human liver tissue,

Antigen affinity purification

Recommended Dilutions:

Basic Information

Catalog Number: 22169-1-AP

GeneID (NCBI): Size: 350 μg/ml 2538 **UNIPROT ID:** Source: Rabbit P35575 Full Name:

glucose-6-phosphatase, catalytic

subunit Immunogen Catalog Number:

AG17839 Calculated MW:

357 aa, 40 kDa

BC130478

GenBank Accession Number:

Applications

Tested Applications:

IHC, ELISA

Isotype:

Cited Applications:

Species Specificity: human, mouse **Cited Species:** human, rat, mouse

Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0

Background Information

 $\hbox{Glucose-6-phosphatase-} \ \alpha \ \hbox{(G6PC) is a key enzyme in glucose homeostasis that catalyzes the hydrolysis of glucose-formula of the control of the co$ 6-phosphate to glucose and phosphate in the terminal step of gluconeogenesis and glycogenolysis. G6PC activity is restricted to the liver, the kidney cortex and the small intestine and confers on these three organs the capacity to release glucose into the systemic circulation (PMID: 21983240). The encoded enzyme is anchored to the ER by nine transmembrane helices with the amino (N)-terminus in the lumen and the carboxyl (C)-terminus in the cytoplasm (PMID: 15542400).

Notable Publications

Author	Pubmed ID	Journal	Application
Linyi Shu	34581420	Int J Mol Med	
Yong Zhang	32970960	Can J Physiol Pharmacol

Storage

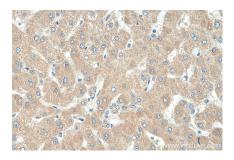

Store at -20°C. Stable for one year after shipment.

Storage Buffer:

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Immunohistochemical analysis of paraffinembedded human liver tissue slide using 22169-1-AP (G6PC antibody) at dilution of 1:200 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).
