

For Research Use Only

# SLC30A1 Polyclonal antibody, PBS Only

Catalog Number: 22661-1-PBS

## Basic Information

Catalog Number:

22661-1-PBS

Size:

1 mg/ml

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG18567

GenBank Accession Number:

BC121015

GeneID (NCBI):

7779

UNIPROT ID:

Q9Y6M5

Full Name:

solute carrier family 30 (zinc transporter), member 1

Calculated MW:

507 aa, 55 kDa

Observed MW:

63-75 kDa

Purification Method:

Antigen affinity purification

## Applications

Tested Applications:

WB, Indirect ELISA

Species Specificity:

human

## Background Information

Zinc transporter 1 (ZNT1), also known as SLC30A1, is the only zinc transporter predominantly located on the plasma membrane, where it plays a pivotal role exporting cytosolic zinc to the extracellular space. SLC30A1 expression is posttranslationally regulated by cellular zinc status and can be N-glycosylated on Asn299 in the extracellular loop between transmembrane domains (PMID: 15451416, 18936201). ZNT1 is located in the plasma membrane and is responsible for Zn export from the cytosol to the extracellular space during periods of elevated cytosolic Zn. Western analysis detected a higher band at 63 kDa than the expected molecular mass, which could be attributed to the properties of the cytosolic histidine-rich loop (PMID: 31471319, 15753530).

## Storage

Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:

PBS Only

W: [ptgcn.com](http://ptgcn.com)

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 22661-1-AP (SLC30A1 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 22661-1-PBS in a different storage buffer formulation.
