

For Research Use Only

LALBA Polyclonal antibody

Catalog Number: 24871-1-AP

Basic Information

Catalog Number: 24871-1-AP	GenBank Accession Number: BC112316	Purification Method: Antigen affinity purification
Size: 350 µg/ml	GeneID (NCBI): 3906	Recommended Dilutions: WB 1:1000-1:4000
Source: Rabbit	UNIPROT ID: P00709	
Isotype: IgG	Full Name: lactalbumin, alpha-	
Immunogen Catalog Number: AG21630	Calculated MW: 142 aa, 16 kDa	
	Observed MW: 13-16 kDa	

Applications

Tested Applications: WB, ELISA	Positive Controls: WB : human milk, human saliva
Species Specificity: human	

Background Information

LALBA encodes alpha-lactalbumin which is secreted calcium metalloprotein, a principal protein of milk. As a monomer, LALBA strongly binds calcium and zinc ions and may possess bactericidal or antitumor activity. LALBA also could form a complex with the beta 1,4-galactosyltransferase to produce the enzyme lactose synthase, participating in the biosynthesis of lactose. Moreover, these proteins enable lactose synthase to produce lactose by transferring galactose moieties to glucose. Studies have demonstrated that LALBA-null transgenic mice showed lacking lactose in the milk and inadequate for feeding the pups (PMID:26304038; PMID:12216958).

Storage

Storage:
Store at -20°C. Stable for one year after shipment.
Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol pH 7.3.
Aliquoting is unnecessary for -20°C storage

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

human saliva were subjected to SDS PAGE followed by western blot with 24871-1-AP (LALBA antibody) at dilution of 1:600 incubated at room temperature for 1.5 hours.

human milk lysates were subjected to SDS PAGE followed by western blot with 24871-1-AP (LALBA antibody) at dilution of 1:2000 incubated at room temperature for 1.5 hours.
