Species Specificity: human, mouse Cited Species: mouse

Positive Controls:

WB: fetal human brain tissue, mouse brain tissue

# **Background Information**

FEV belongs to the ETS transcription factor family. ETS family members have a highly conserved 85-amino acid ETS domain that binds purine-rich DNA sequences. The alanine-rich C-terminus of this gene indicates that it may act as a transcription repressor. This gene is exclusively expressed in neurons of the central serotonin (5-HT) system, a system implicated in the pathogeny of such psychiatric diseases as depression, anxiety, and eating disorders. In some types of Ewing tumors, this gene is fused to the Ewing sarcoma (EWS) gene following chromosome translocations

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

## Selected Validation Data

fetal human brain tissue were subjected to SDS PAGE followed by western blot with 25058-1-AP (FEV Antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours.
