Background Information

FAM40B, also known as STRIP2, is a member of the striatin-interacting phosphatase and kinase (STRIPAK) complex that is involved in the regulation of various processes such as cell proliferation and differentiation. Fam40b in ESCs is as a perinuclear and nucleolar protein with a molecular weight of 96kDa (PMID: 25010986). The expression of Fam40b is essential for the lineage commitment of murine embryonic stem cells (mESCs) into differentiated somatic cells via mechanisms involving pluripotency and epigenetic networks. Catalog#17293-1-AP specially recognises the 96 kDa protein.
