Background Information

TSPYL5 (Testis-specific Y-encoded-like protein 5) is involved in modulation of cell growth and cellular response to gamma radiation probably via regulation of the Akt signaling pathway. It is also involved in the regulation of p53/TP53, and suppresses p53/TP53 protein levels and promotes its ubiquitination; Its function is dependent on USP7 and independent on MDM2 (PMID: 20079711; 21170034).

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 27617-1-AP (TSPYL5 antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 27617-1-PBS in a different storage buffer formulation.
