For Research Use Only

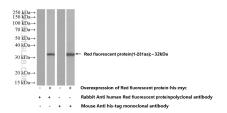

Red fluorescent protein (RFP611) Polyclonal antibody Catalog Number:28063-1-AP

Basic Information	Catalog Number: 28063-1-AP Size: 800 ug/ml Source: Rabbit Isotype: IgG Immunogen Catalog Number: AG27893	GenBank Accession Number:	Purification Method: Antigen affinity purification				
		GeneID (NCBI): UNIPROT ID: Q8ISF8 Full Name: Calculated MW: 26 kDa	Recommended Dilutions: WB 1:500-1:1000				
				Applications	Tested Applications: WB, ELISA	Positive Controls:	
					WB : Transfected HEK-293 cells, Species Specificity: parasicyonis actinostoloides, recombinant protein		
				Background Information	Red fluorescent proteins (RFPs) is a collective term referring to a heterogenous group of red chromophore-carrying proteins, originating from various species and forming different protein lineages. The original RFP (dsRed) is a 225 amino acid fluorescent protein (25.9 kDa) derived from Discosoma sp It emits red light with a peak wavelength of 593 nm upon excitation by green light (excitation peak at 558 nm). When fused with other proteins, RFP serves as a versatile reporter protein e.g. for quantifying expression levels or facilitates visualization of subcellular localization through fluorescence microscopy. This antibody is a rabbit polyclonal antibody raised against RFP from Entacmaea quadricolor (eqFP611).		
Storage	Storage: Store at -20°C. Stable for one year a Storage Buffer: PBS with 0.02% sodium azide and 5 Aliquoting is unnecessary for -20°C	0% glycerol pH 7.3.					

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

WB result of Red fluorescent protein antibody (28063-1-AP; 1:1000; room temperature for 1.5 hours) with negative control and Red fluorescent protein overexpressed Transfected HEK-293 cells.
