Background Information

ARMC3 (Armadillo Repeat Containing 3), also known as the β catenin-like protein, belongs to the CT81 family and is located at 10p12.31. ARMC3 the mouse ortholog of Vac8. It is reported that ARMC3 is important for autophagic elimination of cytosolic ribosomes during spermiogenesis and thus provides energy for flagellar motility (PMID: 34428398). ARMC3 has been identified in many cancer tissues and is thought to play a role in tumor initiation and metastasis.
