For Research Use Only

Phospho-ERK1/2 (Thr2O2/Tyr2O4) Polyclonal antibody Catalog Number:28733-1-AP Featured Product (427 Publication

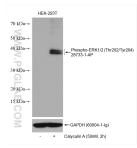

427 Publications

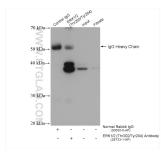

Basic Information	Catalog Number:GenBank Accession Number:28733-1-APNM_002746		ession Number:	Purification Method: Antigen affinity purification	
	Concentration: GeneID (NCBI):		BI):	Recommended Dilutions: WB 1:1000-1:4000 IP 0.5-4.0 ug for 1.0-3.0 mg of total protein lysate	
	600 ug/ml	600 ug/ml 5595			
	Source: Rabbit	UNIPROT ID: P27361			
	Isotype: Full Name: IgG mitogen-activated protein kinase 3				
		Calculated MW: 38-43 kDa Observed MW: 38-43 kDa			
Applications	Tested Applications:	Positive Controls:			
	WB, IP, ELISA	WB : NIH/3T3 cells, Calyculin A treated HEK-293T			reated HEK-293T cells
	Cited Applications: IP : Calyculin A treated PC-3 cells, WB, IHC, IF IP : Calyculin A treated PC-3 cells,				S,
	Species Specificity:				
	human, mouse				
	Cited Species: human, mouse, rat, pig, chicken, zebrafish, sheep				
Background Information	Serine/threonine kinase which acts as an essential component of the MAP kinase signal transduction pathway. MAPK1/ERK2 and MAPK3/ERK1 are the 2 MAPKs which play an important role in the MAPK/ERK cascade. They participate also in a signaling cascade initiated by activated KIT and KITLG/SCF. Depending on the cellular context, the MAPK/ERK cascade mediates diverse biological functions such as cell growth, adhesion, survival and differentiation through the regulation of transcription, translation, cytoskeletal rearrangements. The MAPK/ERK cascade plays also a role in initiation and regulation of meiosis, mitosis, and postmitotic functions in differentiated cells by phosphorylating a number of transcription factors. MEK1 and MEK2 activate p44 and p42 through phosphorylation of activation loop residues Thr202/Tyr204 and Thr185/Tyr187, respectively. Several downstream targets of p44/42 have been identified, including p90RSK and the transcription factor Elk-1. The antibody recognizes ERK2 phosphorylation sites Thr185 and Tyr187.

Selected Validation Data

IP result of anti-Phospho-ERK1/2 (Thr202/Tyr204) (IP:28733-1-AP, 2ug; Detection:28733-1-AP 1:1000) with Calyculin A treated PC-3 cells lysate 1552 ug.

Non-treated and PMA treated NIH/3T3 cells were subjected to SDS PAGE followed by western blot with 28733-1-AP (Phospho-ERK1/2 (Thr202/Tyr204) antibody) at dilution of 1:2000 incubated at room temperature for 1.5 hours.

Non-treated HEK-293T and Calyculin A treated HEK-293T cells were subjected to SDS PAGE followed by western blot with 28733-1-AP (ERK1/2-phospho-Thr202/Tyr204) at dilution of 1:3000 incubated at 4° C overnight. The membrane was stripped and reblotted with GAPDH antibody as loading control.
