Background Information

PTH1R is a receptor for parathyroid hormone and parathyroid hormone-related peptide (PTHrP). PTH1R is a glycoprotein with seven transmembrane domains and it has an extracellular N-terminus region and an intracellular C-terminus region. The activity of PTH1R is mediated by G proteins which activate adenylyl cyclase. It has been reported that PTHrP and PTH1R are associated with the differentiation of bone and cartilage in the developing stages. PTH1R has several isoforms with 66/59 kDa and PTH1R can form a 120 kDa dimer in the non-reducing condition.

Storage

Storage:
Store at -20°C. Stable for one year after shipment.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 29115-1-AP (PTH1R antibody) at dilution of 1:600 incubated at room temperature for 1.5 hours.

Immunohistochemical analysis of paraffin-embedded human pancreas cancer tissue slide using 29115-1-AP (PTH1R antibody) at dilution of 1:200 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).
