Background Information

CCDC39 (Coiled-coil domain-containing protein 39) is an axonemal protein whose absence results in failure to correctly assemble DNALI1-containing inner dynein arm complexes, the DRC (dynein regulatory complex) and the radial spokes, thereby causing axonemal disorganization and dyskinetic beating. Alternatively, CCDC39 could participate in the transport of the inner dynein arms and DRC (PMID: 21131972). Its calculated molecular weight and observed molecular weight are both 110kDa.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 29817-1-AP (CCDC39 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 29817-1-PBS in a different storage buffer formulation.

Immunofluorescent analysis of (4% PFA) fixed mouse brain tissue using CCDC39 antibody (29817-1-AP) at dilution of 1:200 and CoraLite® 488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L). This data was developed using the same antibody clone with 29817-1-PBS in a different storage buffer formulation.
