VAMP2 Polyclonal antibody

Catalog Number:30001-0-AP 4 Publications

Antibodies | ELISA kits | Proteins www.ptglab.com

Basic Information	Catalog Number: 30001-0-AP	GenBank Accession Number: NM_014232	Purification Method: Antigen affinity purification	
	Size:	GenelD (NCBI):	Recommended Dilutions:	
	400 µ g/ml	6844	WB 1:1000-1:4000	
	Source: Goat	UNIPROT ID: P63027		
	lsotype: IgG			
		Calculated MW: 13 kDa		
Applications	Tested Applications: WB,ELISA	Positive Controls:		
	Cited Applications: WB, ELISA	WB : Mouse brain tissue ,		
	Species Specificity: human			
	Cited Species: human			
Packaround Information	On VAMP2 (vesicle-associated r	VAMP2 (vesicle-associated membrane protein 2), also named as synaptobrevin 2, is a member of the SNARE (soluble NSF-attachment protein receptor) family of proteins. Characterized by a common sequence called the SNARE motif, SNARE proteins are involved in membrane fusion and vesicular transport (PMID: 11252968). VAMP2 consists of a short N-terminal sequence, a SNARE motif, and a C-terminal transmembrane region. It is required for fast calcium-triggered synaptic vesicle fusion. VAMP2 forms a stable complex with STX1 (syntaxin 1) and SNAP25 (synaptosomal-associated protein 25) during synaptic vesicle fusion (PMID: 16793874). It also forms a distinct complex with synaptophysin. VAMP2 is expressed in nervous system and some non-neuronal tissues, such as skeletal muscle (PMID: 18570252).
