Background Information

ATP synthase mitochondrial F1 complex assembly factor 2 (ATPAF2) also name as ATP12 and ATP12p, is an essential house keeping protein. ATPAF2 is an assembly factor for the F1 component of mitochondrial ATP synthase. This protein binds specifically to the F1 alpha subunit and is thought to prevent this subunit from forming nonproductive homooligomers during enzyme assembly. The calculated MW is 33 kDa, 30334-1-AP can detect bands around 30 kDa and 50 kDa, the larger band may correspond to dimer or complex form. (PMID: 1826907, 11410595)
