

For Research Use Only

SOX14 Polyclonal antibody, PBS Only

Catalog Number:30613-1-PBS

Basic Information

Catalog Number:

30613-1-PBS

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG31127

GenBank Accession Number:

BC106730

GeneID (NCBI):

8403

UNIPROT ID:

O95416

Full Name:

SRY (sex determining region Y)-box
14

Calculated MW:

240 aa, 26 kDa

Observed MW:

26 kDa

Purification Method:

Antigen affinity purification

Applications

Tested Applications:

WB, Indirect ELISA

Species Specificity:

human, mouse

Background Information

SOX14, also known as SOX28, is a member of the SOX (SRY-related HMG-box) family of transcription factors. This intronless gene encodes a protein that acts as a transcriptional regulator after forming complexes with other proteins. It is involved in embryonic development and cell fate determination. SOX14 is primarily expressed in the nervous system, where it plays a role in neuronal differentiation and circuit formation. Mutations in SOX14 are suggested to be responsible for limb defects associated with conditions such as blepharophimosis, ptosis, epicanthus inversus syndrome (BPES), and Moebius syndrome. Additionally, SOX14 has been implicated in tumor development, with studies indicating its involvement in cervical cancer through mechanisms such as the p53 and Wnt/ β -catenin pathways. (PMID: 34098886, PMID: 34181293)

Storage

Storage:

Store at -80°C .

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:

PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Mouse brain tissue were subjected to SDS PAGE followed by western blot with 30613-1-AP (SOX14 antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 30613-1-PBS in a different storage buffer formulation.
