For Research Use Only METTL8 Polyclonal antibody Catalog Number: 31173-1-AP

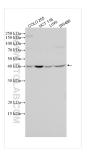

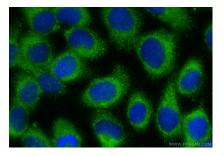

Basic Information	Catalog Number: 31173-1-AP	GenBank Accession Number: BC025250	Purification Method: Antigen affinity Purification	
	Concentration: 600 ug/ml Source: Rabbit Isotype: IgG Immunogen Catalog Number: AG34222	GeneID (NCBI): 79828 UNIPROT ID: Q9H825	Recommended Dilutions: WB 1:500-1:3000 IF/ICC 1:200-1:800	
				Full Name: methyltransferase like 8
		Calculated MW: 33 kDa		
		Observed MW: 33~40 kDa		
		Applications	Tested Applications: WB, IF/ICC, ELISA Species Specificity: human	Positive C
WB : COLO cells	VB : COLO 205 cells, HCT 116 cells, LoVo cells, SW48( ells			
IF/ICC : A	431 cells,			
Background Information	METTL8 (methyltransferase-like protein 8) is an m3C methyltransferase that is best known for its mitochondrial rol in installing m3C32 on mt-tRNAThr/Ser(UCN). METTL8 has proved to be a transcriptional target of STAT3 that mediates STAT3's functions in mESCs (PMID: 29706498). METTL8 has multiple splicing isoforms and can undergo sumoylation and associate with nuclear RNA-binding proteins to regulate R-loop formation on ribosomal DNA gene (presumably via its methyltransferase activity on m3C) (PMID: 38744809).			
Background mornation	sumoylation and associate with n	uclear RNA-binding proteins to regula	ultiple splicing isoforms and can undergo te R-loop formation on ribosomal DNA gene

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 31173-1-AP (METTL8 antibody) at dilution of 1:1500 incubated at room temperature for 1.5 hours. Immunofluorescent analysis of (-20°C Methanol) fixed A431 cells using METTL8 antibody (31173-1-AP) at dilution of 1:400 and CoraLite®488-Conjugated Goat Anti-Rabbit IgG(H+L) (SA00013-2).
