

For Research Use Only

# UBAP1L Polyclonal antibody, PBS Only

Catalog Number: 31189-1-PBS

## Basic Information

Catalog Number:

31189-1-PBS

Concentration:

1 mg/ml

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG34816

GenBank Accession Number:

NM\_001163692

GeneID (NCBI):

390595

UNIPROT ID:

F5GYI3

Full Name:

similar to ubiquitin-associated protein 1 (predicted)

Calculated MW:

41 kDa

Observed MW:

41 kDa

Purification Method:

Antigen affinity Purification

## Applications

Tested Applications:

WB, Indirect ELISA

Species Specificity:

human

## Background Information

UBAP1L is a fairly unknown protein. It is predicted to enable ubiquitin binding activity and is believed to be involved in the ubiquitin-dependent protein catabolic process through the multivesicular body sorting pathway. It is also predicted to be part of endosomal sorting complexes required for transport. UBAP1L contains a SOUBA domain, which begins at amino acid residue 269 and extends to the C terminus of the protein. This domain is similar to the one found in UBAP1, where it is known to interact with ubiquitin (PMID: 38293907).

## Storage

Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:

PBS only, pH7.3

W: [ptgcn.com](http://ptgcn.com)

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

Caco-2 cells were subjected to SDS PAGE followed by western blot with 31189-1-AP (UBAP1L antibody) at dilution of 1:1500 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 31189-1-PBS in a different storage buffer formulation.
