

For Research Use Only

EFCAB4A Polyclonal antibody, PBS Only

Catalog Number: 32115-1-PBS

Featured Product

Basic Information

Catalog Number:

32115-1-PBS

Concentration:

1 mg/ml

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG37031

GenBank Accession Number:

BC033196

GeneID (NCBI):

283229

UNIPROT ID:

Q8N4Y2

Full Name:

EF-hand calcium binding domain 4A

Observed MW:

50 kDa

Purification Method:

Antigen affinity Purification

Applications

Tested Applications:

WB, Indirect ELISA

Species Specificity:

human

Background Information

EFCAB4A (EF-hand calcium-binding domain-containing protein 4A), also known as CRACR2B (calcium release-activated calcium channel regulator 2B), is a calcium-binding protein containing EF-hand structural domain. EFCAB4A is thought to play a key role in calcium bank-manipulated calcium endocytosis (SOCE) in T cells by regulating activation of CRAC (calcium release-activated calcium channel) channels. This protein may perform a similar function to EFCAB4B, which acts as a cytoplasmic calcium sensor that forms a complex with ORAI1 and STIM1 in the region of the junction between the endoplasmic reticulum and the plasma membrane. The EFCAB4A protein contains two EF-hand structural domains, which may be involved in calcium bank-manipulated calcium endocytosis.

Storage

Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:

PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 32115-1-AP (EFCAB4A antibody) at dilution of 1:3000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 32115-1-PBS in a different storage buffer formulation.

WB result of EFCAB4A antibody (32115-1-AP; 1:2000; incubated at room temperature for 1.5 hours) with sh-Control and sh-EFCAB4A transfected LNCaP cells. This data was developed using the same antibody clone with 32115-1-PBS in a different storage buffer formulation.
