Background Information

ZNF444 (Zinc Finger Protein 444) is a member of the zinc finger protein family, which are characterized by their ability to bind DNA, RNA, and proteins through zinc finger motifs. ZNF444 is encoded by the ZNF444 gene in humans and is involved in various cellular processes, including transcriptional regulation and immune responses.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 32588-1-AP (ZNF444 antibody) at dilution of 1:1500 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 32588-1-PBS in a different storage buffer formulation.
