

For Research Use Only

PAK3 Polyclonal antibody, PBS Only

Catalog Number: 32848-1-PBS

Basic Information

Catalog Number: 32848-1-PBS	GenBank Accession Number: NM_001128173.2	Purification Method: Antigen affinity Purification
Concentration: 1 mg/ml	GeneID (NCBI): 5063	
Source: Rabbit	UNIPROT ID: O75914	
Isotype: IgG	Full Name: p21 protein (Cdc42/Rac)-activated kinase 3	
Immunogen Catalog Number: AG38566	Calculated MW: 62kDa, 559aa	
	Observed MW: 64 kDa	

Applications

Tested Applications:
WB, Indirect ELISA

Species Specificity:
human, mouse, rat, pig

Background Information

PAK3, also known as p21-activated kinase 3, is a member of the PAK family of serine/threonine protein kinases, classified as Group I PAK kinases along with PAK1 and PAK2. PAK3 is predominantly expressed in neural cells, especially in regions such as the brain. PAK3 plays a crucial role in dendritic spine development and synaptic plasticity. PAK3 plays an important role in cell migration and morphology. It regulates dynamic changes in the actomyosin cytoskeleton, microtubules, and adhesion interactions with the microenvironment. In neurons and other cell types, PAK3 contributes to cell migration, neurite growth, and dendritic spine morphogenesis by participating in signaling cascades that control cell adhesion and cell motility. Mutations in PAK3 are associated with X-linked non-syndromic intellectual disability.

Storage

Storage:
Store at -80°C.
The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:
PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 32848-1-AP (PAK3 antibody) at dilution of 1:3000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 32848-1-PBS in a different storage buffer formulation.
