

For Research Use Only

POLE2 Polyclonal antibody, PBS Only

Catalog Number:33482-1-PBS

Basic Information

Catalog Number:

33482-1-PBS

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG38070

GenBank Accession Number:

BC126218

GeneID (NCBI):

5427

UNIPROT ID:

P56282

Full Name:

polymerase (DNA directed), epsilon 2
(p59 subunit)

Calculated MW:

527 aa, 60 kDa

Observed MW:

60 kDa

Purification Method:

Antigen affinity Purification

Applications

Tested Applications:

WB, IF/ICC, Indirect ELISA

Species Specificity:

human

Background Information

DNA polymerase epsilon subunit 2 (POLE2) is involved in cellular functions such as DNA replication, repair, and cell cycle control, as well as in the array-based proliferative signatures (PMID: 9745046; 12620412). Knockdown of POLE2 could suppress esophageal squamous cell carcinoma development through regulating cell proliferation, apoptosis, and migration (PMID: 32831648). POLE2 can also regulate the development of oral squamous cell carcinoma by inhibiting the PI3K/AKT signaling pathway (PMID: 38079056).

Storage

Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:

PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 33482-1-AP (POLE2 antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 33482-1-PBS in a different storage buffer formulation.

Immunofluorescent analysis of (4% PFA) fixed A431 cells using POLE2 antibody (33482-1-AP) at dilution of 1:200 and CoraLite@488-Conjugated Goat Anti-Rabbit IgG(H+L) (SA00013-2), CL594-phalloidin (red). This data was developed using the same antibody clone with 33482-1-PBS in a different storage buffer formulation.
