

For Research Use Only

GPR175 Polyclonal antibody, PBS Only

Catalog Number: 33499-1-PBS

Basic Information

| | | |
|---|---|--|
| Catalog Number: 33499-1-PBS | GenBank Accession Number: BC050711 | Purification Method: Antigen affinity Purification |
| Concentration: 1 mg/ml | GeneID (NCBI): 131601 | |
| Source: Rabbit | UNIPROT ID: Q86W33 | |
| Isotype: IgG | Full Name: G protein-coupled receptor 175 | |
| Immunogen Catalog Number: AG39379 | Observed MW: 55 kDa | |

Applications

Tested Applications:
WB, Indirect ELISA

Species Specificity:
human

Background Information

GPR175, also known as TPRA1 or TPRA40, is a transmembrane protein. GPR175 was first cloned as a GLP-1 receptor homolog in 3T3-L1 adipocytes and is also expressed in tissues that require Hh signaling during development, including the heart, brain, lung, pancreas, and muscle. Endogenous GPR175 localizes to cilia in a Hh-dependent manner, where it can interact with (constitutively) ciliary G α i1 to inhibit the local production of cAMP by adenylyl cyclase. The calculated molecular weight of GPR175 is 41 kDa. With glycosylation modification, the molecular weight of GPR175 will be migrated to 55 kDa. (PMID: 26451044)

Storage

Storage:
Store at -80°C.
The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:
PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

HeLa cells were subjected to SDS PAGE followed by western blot with 33499-1-AP (GPR175 antibody) at dilution of 1:1500 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 33499-1-PBS in a different storage buffer formulation.
