

For Research Use Only

CHRNE Polyclonal antibody, PBS Only

Catalog Number: 55360-1-PBS

Basic Information

Catalog Number:

55360-1-PBS

Size:

1 mg/ml

Source:

Rabbit

Isotype:

IgG

GenBank Accession Number:

NM_000080

GeneID (NCBI):

1145

UNIPROT ID:

Q04844

Full Name:

cholinergic receptor, nicotinic, epsilon

Calculated MW:

55 kDa

Observed MW:

40-50 kDa

Purification Method:

Antigen affinity purification

Applications

Tested Applications:

WB, Indirect ELISA

Species Specificity:

human, mouse, rat

Background Information

Acetylcholine receptor subunit epsilon is a protein that in humans is encoded by the CHRNE gene. Acetylcholine receptors at mature mammalian neuromuscular junctions are pentameric protein complexes composed of four subunits in the ratio of two alpha subunits to one beta, one epsilon, and one delta subunit. The acetylcholine receptor changes subunit composition shortly after birth when the epsilon subunit replaces the gamma subunit seen in embryonic receptors. Mutations in the epsilon subunit are associated with congenital myasthenic syndrome.

Storage

Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:

PBS Only

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 55360-1-AP (CHRNE antibody) at dilution of 1:800 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 55360-1-PBS in a different storage buffer formulation.
