

ING4 Monoclonal antibody

Catalog Number: 60110-1-Ig

Basic Information

Catalog Number:

60110-1-Ig

Size:

1000 µg/ml

Source:

Mouse

Isotype:

IgG1

Immunogen Catalog Number:

AG4610

GenBank Accession Number:

BC007781

GeneID (NCBI):

51147

UNIPROT ID:

Q9UNL4

Full Name:

inhibitor of growth family, member 4

Calculated MW:

29 kDa

Observed MW:

29 kDa

Purification Method:

Caprylic acid/ammonium sulfate precipitation

CloneNo.:

1F5G10

Applications

Tested Applications:

ELISA

Species Specificity:

human

Background Information

ING4, also named as p29ING4, belongs to the ING family. It is a component of the HBO1 complex which has a histone H4-specific acetyltransferase activity, a reduced activity toward histone H3 and is responsible for the bulk of histone H4 acetylation in vivo. It may inhibit tumor progression by modulating the transcriptional output of signaling pathways which regulate cell proliferation. ING4 can suppress brain tumor angiogenesis through transcriptional repression of RELA/NFκB3 target genes when complexed with RELA. It may also specifically suppress loss of contact inhibition elicited by activated oncogenes such as MYC. Represses hypoxia inducible factor's (HIF) activity by interacting with HIF prolyl hydroxylase 2 (EGLN1). ING4 is a tumor suppressor gene that interacts with NFκB and represses its transcriptional activity. Several lines of evidence suggest that the tumor suppressor gene ING4, NFκB and its target genes matrix metalloproteinases MMP-2, MMP-9 and u-PA are critically involved in tumor invasion. This antibody is a mouse monoclonal antibody raised against full length human ING4 antigen.

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

Storage Buffer:

PBS with 0.1% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage
