# **Background Information**

COX411, also named as COX4 and COXIV-1, belongs to the cytochrome c oxidase IV family. It is one of the nuclear-coded polypeptide chains of cytochrome c oxidase, the terminal oxidase in mitochondrial electron transport. COX411 is a marker for mitochondria. It has two isoforms (isoform 1 and 2). Isoform 1(COX411) is ubiquitously expressed and isoform 2 is highly expressed in lung tissues. COX411 is commonly used as a loading control. This antibody is specific to COX411 and do not cross reacts with COX412.
