

For Research Use Only

Anti-Human ALCAM (3A6)

Catalog Number: 65223-1-Ig

Basic Information

Catalog Number: 65223-1-Ig	GenBank Accession Number: BC057809	Purification Method: Affinity purification
Size: 100ug, 0.5 mg/mL	GeneID (NCBI): 214	CloneNo.: 3A6
Source: Mouse	UNIPROT ID: Q13740	
Isotype: IgG1, kappa	Full Name: activated leukocyte cell adhesion molecule	
	Calculated MW: 105 kDa	

Applications

Tested Applications:
FC

Species Specificity:
Human

Background Information

Activated leukocyte cell adhesion molecule (ALCAM, also known as CD166) is a cell adhesion molecule that belongs to the immunoglobulin superfamily. It is involved in cell-cell adhesion through homophilic and heterophilic (to CD6) interactions. ALCAM is widely expressed in a variety of normal tissues and cell types, including activated T cells and monocytes, epithelial cells, fibroblasts, neuronal cells, hepatocytes, and bone marrow mesenchymal stem cells (PMID: 7760007; 25221999). Altered ALCAM expression has been associated with the differentiation state and progression in some neoplasms including melanoma, prostate, colorectal, and breast cancers (PMID: 20461761; 18172759).

Storage

Storage:
Store at 2-8°C. Stable for one year after shipment.

Storage Buffer:
PBS with 0.09% sodium azide.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

1X10⁶ PHA treated human PBMCs were surface stained with 0.2 ug Anti-Human ALCAM (65223-1-Ig, Clone:3A6) and CL594-Goat anti-Mouse IgG at dilution 1:1000 (red) or unstained (blue). Cells were not fixed. Monocytes were gated.
