## Anti-Human IL3RA/CD123 (HI12H7)

Catalog Number:65256-1-lg

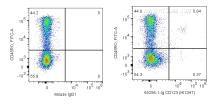

Catalog Number: 65256-1-lg	GenBank Accession Number: BC035407	Purification Method: Affinity purification
Concentration: 100ug, 0.5 mg/ml	GenelD (NCBI): 3563	CloneNo.: HI 12H7
Source: Mouse	ENSEMBL Gene ID: ENSG00000185291	
lsotype: IgG1, kappa	Full Name: interleukin 3 receptor, alpha (low affinity)	I
	Calculated MW: 378 aa, 43 kDa	
Tested Applications: FC		
Species Specificity: human		
CD123, also referred to as interleukin-3 receptor subunit alpha (IL-3R a), belongs to the cytokine receptor family. It is a glycoprotein containing an extracellular domain, involving a predicted Ig-like domain, two FnIII domains, a transmembrane domain and an intracellular domain (PMID: 24513123). CD123 is expressed on hematopoietic progenitor cells, plasmacytoid dendritic cells, basophils, monocytes, some B cells, and in a variety of hematologic malignancies (PMID: 10527461; 34855461). IL-3 initially binds to CD123 and subsequently recruits the beta chain (CD131) to form the high-affinity receptor, resulting in the activation of a series of signaling pathways including the JAK/STAT, Ras-MAPK, and phosphatidylinositol 3-kinase pathways (PMID: 29296749). IL-3R signaling regulates the proliferation, survival, and differentiation of hematopoietic cells.		
Storage Buffer:		
	65256-1-1g Concentration: 100ug, 0.5 mg/ml Source: Mouse Isotype: IgG1, kappa Tested Applications: FC Species Specificity: human CD123, also referred to as in is a glycoprotein containing transmembrane domain and progenitor cells, plasmacyto malignancies (PMID: 105274 (CD131) to form the high-aff JAK/STAT, Ras-MAPK, and pf proliferation, survival, and of Storage: Store at 2-8°C. Stable for one Storage Buffer:	65256-1-lg BC035407   Concentration: GeneID (NCBI):   100ug, 0.5 mg/ml 3563   Source: ENSEMBL Gene ID:   Mouse ENSG0000185291   Isotype: Full Name:   IgG1, kappa interleukin 3 receptor, alpha (low affinity)   Calculated MW: 378 aa, 43 kDa   Tested Applications: FC   Species Specificity: human   CD123, also referred to as interleukin-3 receptor subunit alpha (IL-3R a is a glycoprotein containing an extracellular domain, involving a preditransmembrane domain and an intracellular domain (PMID: 24513123), progenitor cells, plasmacytoid dendritic cells, basophils, monocytes, so malignancies (PMID: 10527461; 34855461). IL-3 initially binds to CD12 (CD131) to form the high-affinity receptor, resulting in the activation of JAK/STAT, Ras-MAPK, and phosphatidylinositol 3-kinase pathways (PM proliferation, survival, and differentiation of hematopoietic cells.   Storage: Storage:   Storage: Storage After Store at 2-8°C. Stable for one year after shipment.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

1X10^6 human PBMCs were surface co-stained with FITC Anti-Human CD45RO and 0.2 ug Anti-Human CD123 (65256-1-1g, Clone:HI 12H7) labeled with FlexAble CoraLite® Plus 647 Antibody Labeling Kit for Mouse IgG1 or Mouse IgG1 lsotype Control. Cells were not fixed. Lymphocytes were gated.
