

For Research Use Only

GST Tag Monoclonal antibody, PBS Only

Catalog Number: 66001-2-PBS

Basic Information

Catalog Number: 66001-2-PBS	GenBank Accession Number: FN315687	Purification Method: Protein A purification
Size: 1 mg/ml	GeneID (NCBI): Full Name:	CloneNo.: 3G12B10
Source: Mouse	Calculated MW: 26 kDa	
Isotype: IgG2a		

Applications

Tested Applications:
WB, IP, Indirect ELISA

Species Specificity:
Recombinant protein, Schistosoma japonicum

Background Information

Protein tags are protein or peptide sequences located either on the C- or N- terminal of the target protein, which facilitates one or several of the following characteristics: solubility, detection, purification, localization and expression. GST (Glutathione S-Transferase) is a widely used protein tag encoded by the Schistosoma japonicum. GST provides both an easily detectable tag and a simple purification process with little effect on the biological function of the protein of interest. Antibodies to GST are useful for checking protein expression both in plaques and on Western blots as well as for immunoaffinity purification of proteins expressed in cells. This antibody recognizes the GST-tag fused to either the N- or C-terminus of targeted proteins.

Storage

Storage:
Store at -80°C.

Storage Buffer:
PBS Only

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

GST tagged recombinant protein (25ng/lane) was subjected to SDS-PAGE followed by western blot with anti-GST tag monoclonal antibody 66001-2-Ig at various dilutions. This data was developed using the same antibody clone with 66001-2-PBS in a different storage buffer formulation.

GST protein (25 ng), pGEX6P-1 vector expressed in E. coli, were subjected to SDS PAGE followed by western blot with 66001-2-Ig (GST Tag antibody, 1:200,000) incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 66001-2-PBS in a different storage buffer formulation.

IP result of anti-GST Tag (IP:66001-2-Ig, 5ug; Detection:66001-2-Ig 1:10000) with Total E. coli lysate (with pGEX4T fused plasmid) 1360 ug. This data was developed using the same antibody clone with 66001-2-PBS in a different storage buffer formulation.
