For Research Use Only

NEUROD1 Monoclonal antibody

Catalog Number: 66691-1-Ig

Purification Method:

Protein A purification

Recommended Dilutions:

WB 1:5000-1:50000 IHC 1:500-1:2000

CloneNo.:

3E10F1

Basic Information

Catalog Number: GenBank Accession Number: 66691-1-lg BC009046

Concentration: GeneID (NCBI): 4760

Source: UNIPROT ID: Mouse Q13562

Isotype: Full Name:
IgG1 neurogenic differentiation 1

Immunogen Catalog Number:Calculated MW:AG27606356 aa, 40 kDaObserved MW:

Observed MW: 40-50 kDa

Applications

Tested Applications: WB, IHC, FC (Intra), ELISA Species Specificity:

human, mouse

Note-IHC: suggested antigen retrieval with TE buffer pH 9.0; (*) Alternatively, antigen retrieval may be performed with citrate buffer pH 6.0 Positive Controls:

WB: Y79 cells, SH-SY5Y cells

IHC: human pancreas cancer tissue,

Background Information

NeuroD is a member of the basic helix-loop-helix (bHLH) family of transcription factors. The basic helix-loop-helix (bHLH) proteins are transcription factors that are required for several aspects of development, including cell type determination, terminal differentiation and sex determination. Members of the myogenic determination family, MyoD, myf5, myogenin and MRF 4, all have bHLH domains. These proteins function by forming heterodimers with E-proteins and binding to the canonical E-box sequence CANNTG. Neuro D is expressed transiently in a subset of neurons in the central and peripheral nervous systems at the time of their terminal differentiation into mature neurons. Moreover, ectopic expression of Neuro D in Xenopus embryos induces premature differentiation of neuronal precursors and Neuro D can convert presumptive epidermal cells into neurons. The lack of NeuroD in the brain results in severe defects in development. Human mutations have been linked to a number of types of diabetes including type I diabetes mellitus and maturity-onset diabetes of the young. The calculated molecular weight of NEUROD1 is 39 kDa, but the modified NEUROD1 protein is about 45-50 kDa.

Storage

Storage:

Store at -20°C. Stable for one year after shipment.
Storage Buffer:

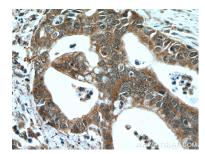

PBS with 0.02% sodium azide and 50% glycerol, pH7.3

Aliquoting is unnecessary for -20°C storage

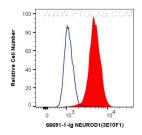

Selected Validation Data

Y79 cells were subjected to SDS PAGE followed by western blot with 66691-1-1g (NEUROD1 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours.

Immunohistochemical analysis of paraffinembedded human pancreas cancer tissue slide using 66691-1-1g (NEUROD1 antibody) at dilution of 1:1000 (under 40x lens. Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0).

1X10^6 SH-SY5Y cells were intracellularly stained with 0.5 ug Anti-Human NEUROD1 (66691-1-lg, Clone:3E10F1) (red) labeled with FlexAble CoraLite® PLus 555 Antibody Labeling Kit for Mouse IgG1 (KFA022), or 0.5 ug Control Antibody. Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C).
