Background Information

β -Arrestins (ARRBs), the best known regulators of G protein-coupled receptor signaling, are versatile and multifunctional adapter proteins that regulate diverse cellular functions, including cell growth, apoptosis and immune responses. Overexpression of beta Arrestin 1 has been found in various cancers, indicating it as a potential therapeutic target for cancer treatment. Recently expression of ARRB1 in saliva has been identified as a candidate circadian biomarker. ARRB1 migrated as a doublet of two bands of 45 and 55 kDa (PMID:28947386).

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 67580-1-Ig (Arrestin antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 67580-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffin-embedded mouse brain tissue slide using 67580-1-Ig (Beta Arrestin 1 antibody) at dilution of 1:500 (under 40x Lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 67580-1-PBS in a different storage buffer formulation.

WB result of Beta Arrestin 1 antibody (67580-1-Ig; 1:8000; incubated at room temperature for 1.5 hours) with sh-Control and sh-Beta Arrestin 1 transfected HepG2 cells. This data was developed using the same antibody clone with 67580-1-PBS in a different storage buffer formulation.
